CEO MESSAGE

Thank you for your interest in Borderless Security

At Borderless Security, we take pride in being more than just a service provider — we are a trusted partner to our clients. This overview has been designed to give you a clear understanding of who we are, what we do, and the value we can bring to your business. Our work spans a wide range of services, expertise, and real-world experience. While no single document can capture every client's unique challenges, this profile offers a glimpse into our areas of specialism and the tailored approach we bring to each engagement. We recognise that every project is different, which is why flexibility and adaptability are at the heart of what we do. Our proven track record demonstrates our ability to deliver bespoke solutions that meet diverse and evolving business needs.

We are always open to new opportunities and collaborations. If you would like to explore how Borderless Security can support your business ambitions, please contact us at **Sales@borderlesssecurity.com**

I am confident that our experienced team can make a meaningful difference to your organisation, and I look forward to the possibility of working together.

Sincerely

Mohammed Sahib
CEO

CORPORATE OVERVIEW

Who We Are?

Borderless Security is a Network, Security and Software Development Services firm based in UK-Iraq and UAE offering fully customised services to businesses. We have extensive experience in diverse areas of Network, Security, and Software Development. Our team of professionals has worked with a wide range of vendors' platforms and tools in a range of languages across our diverse project portfolio.

What We Do?

Borderless Security is a conscious evolving company that provides Network Security and state-of-the-art security applications such as smart contracts, digital currency, and wallet development. Additionally, we work closely with Amazon, Google, and Microsoft Azure data centres. To meet growing industry demands with their niche software development requests, Borderless Security provides comprehensive technology services focused on making the world a safer place.

EXPERIENCE

Borderless Security is a Network, Security, and Software Development company. We develop security software and integrate security into software during the design and development process aligned to your specific business needs.

- Artificial Intelligence and Machine Learning
- Network and Security
- Infrastructure and Data Centers
- Software and Portal Developments
- e-Government Projects and Integrations
- Migrations and Transitions
- e-Payment and Finance Services

WE FOCUS ON DIFFERENT DOMAINS LIKE

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

NETWORK AND SECURITY

SOFTWARE DEVELOPMENT

MOBILE APP DEVELOPMENT

E-GOVERNMENT PROJECTS

INFRASTRUCTURE AND DATA CENTERS

OUR SERVICES

NETWORK AND SECURITY

- Network architect design and implementation
- Secured data and communications
- Traffic encryption and VPNs
- Business continuity, redundancy, and failover
- Secured remote user access
- Public cloud services (Azure, Amazon, Google)
- Private cloud and on-premises services
- Monitoring, reporting, and logging services
- Infrastructure and data center design

APPLICATIONS AND SOFTWARE DEVELOPMENT

- Health and hospital management system
- Smart school management system
- Real estate management system
- Multi-vendor e-commerce and e-cart system
- Human resource management system
- Artificial Intelligence and Machine Learning solutions
- e-Payment and wallet payment system
- User applications and e-forums

E-Government Services

- Infrastructure design
- Full and secured connectivity between all government locations
- Multi-service portals
- Data encryption
- Secured employee login with multi-factor authentication
- Online e-Payments
- Workflow inside one organization and others
- Cybersecurity and operation center
- Technical training for employees
- Management training for managers and leaders
- Agile training

OUR SERVICES

Cyber Security

- **24/7 Threat Monitoring** – Continuous surveillance to detect and respond to cyber threats in real time.
- **SOC Operations** – Centralised Security Operations Centre for proactive incident management.
- **Intrusion Detection & Prevention** – Advanced firewalls and IDS/IPS systems to stop attacks before impact.
- **SIEM Integration** – Security Information & Event Management for log analysis and threat correlation.
- **Endpoint & Network Security** – Protection across servers, endpoints, and network layers.
- **Compliance & Auditing** – Regular assessments to meet ISO, GDPR, HIPAA, and industry regulations.
- **Automated Alerts & Response** – AI-driven alerts with automated playbooks for rapid mitigation.
- **Disaster Recovery & Resilience** – Secure backup, failover, and business continuity planning.

Partnership

At Borderless Security, our goal is to be the first choice for network, security, and software services. We go beyond meeting expectations — we aim to impress. By building lasting partnerships and delivering exceptional results, we earn our clients' trust and become their trusted partner for future needs.

Experience

At Borderless Security, quality begins with experience and is defined by dedication. Our professionals bring years of expertise in designing, developing, and testing a wide range of projects. It is this combination of proven experience and unwavering commitment to excellence that sets us apart.

A Proven Track Record

Borderless Security has a proven record of delivering high-quality, tailored solutions. Our clients range from Fortune 100 corporations and government agencies to small businesses. With broad expertise across the full network, security, and software development lifecycle, we bring trusted experience to every project.

OUR PRODUCTS

UMLLA

Electronic Payment, e-Wallet and Collection

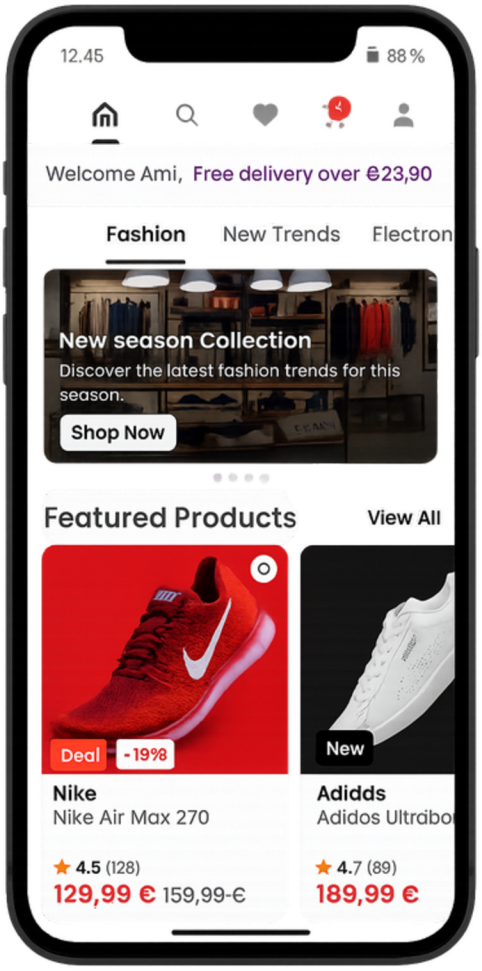

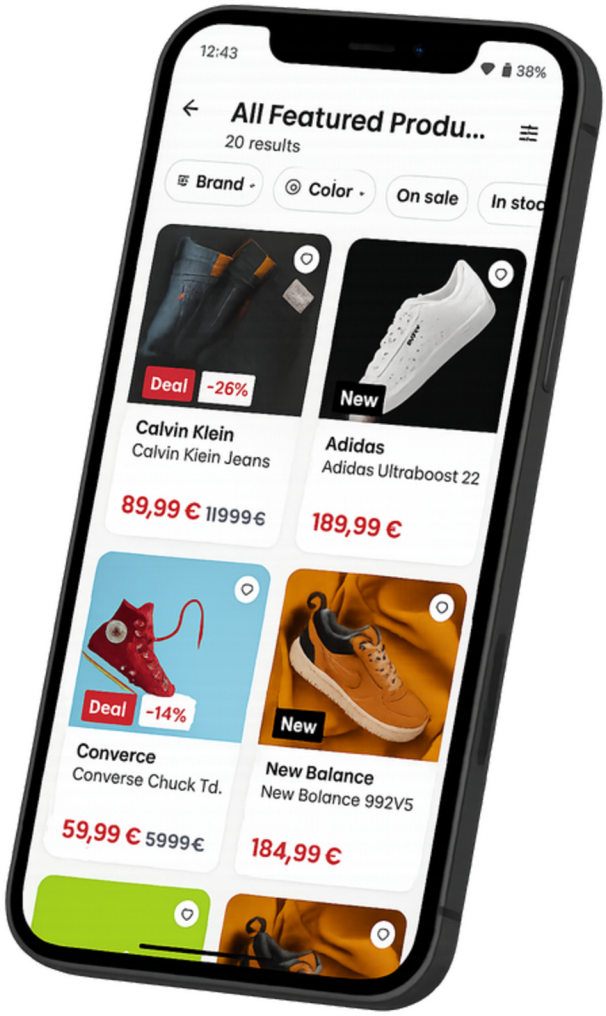

- **Seamless Funds Transfer** – Instant, reliable money transfers with tailored extensions for personal and business use.
- **Robust Security** – Advanced encryption, multi-factor authentication, and fraud protection to safeguard every transaction.
- **User-Friendly Mobile Interface** – Intuitive design for easy navigation, making financial management simple for all users.
- **Dual Exchange Support** – Integrated access to both traditional currency and cryptocurrency exchanges.
- **Comprehensive Financial Operations** – Bill payments, merchant purchases, peer-to-peer payments, and savings features in one app.
- **Flexible Transaction Management** – Track, categorise, and analyse all transactions with smart reporting tools.

OUR PRODUCTS

Dynamic E-Commerce Solutions for Modern Businesses

- **Dynamic Product Catalogue** – Real-time sync with FilesDNA for product listings, categories, and stock.
- **Smart Pricing & Discounts** – Automated promotions, tiered pricing, and discount rules directly from the backend.
- **Seamless Order Management** – End-to-end sales flow from cart to invoice, integrated with FilesDNA.
- **Multi-Channel Payments** – Secure checkout supporting cards, wallets, and integrated FilesDNA e-signature for approvals.
- **Customer Profiles & Loyalty** – Personalised accounts, order history, and loyalty points managed dynamically.
- **Advanced Search & Filters** – AI-powered search with dynamic filtering (brand, price, stock, attributes).
- **Real-Time Analytics** – Sales dashboards, customer insights, and inventory tracking integrated with FilesDNA backend.
- **Scalable & Secure Architecture** – Cloud-ready design with FilesDNA security layers and modular FilesDNA backend.

OUR PRODUCTS

PANTONA

Elevate Your Communication

Pantona is a messaging app that enables real-time messaging, audio and video calls, groups and conferencing.

Pantona is your all-in-one solution for chat, messaging, voice, video, and meetings, designed to make staying in touch seamless and enjoyable. Our platform combines elegance with functionality, allowing for stylish messaging, effortless sharing, and vibrant conversations.

Features at a Glance: Expressive Messaging: Share texts, photos, videos, and documents easily. Enrich your chats with a wide selection of emoticons and icons.

Group Connectivity: Create groups for any purpose, from work projects to family updates, enhancing collaboration and connection.

High-Quality Calls: Enjoy crystal-clear voice and video calls, bringing you closer to your loved ones and colleagues with superior call quality.

Collaborate Efficiently: Pantona's intuitive design facilitates real-time collaboration and communication, keeping teams productive and in sync.

Easy Group Calls: Organize group voice and video calls effortlessly, perfect for inclusive meetings or casual catch-ups.

Secure and Private: Information can be concealed within photos, text, and videos using steganography or watermarking methods.

OUR PRODUCTS

AI Chat Bot

- **Smart Conversations** – AI-powered, natural, and interactive dialogue.
- **Product Knowledge** – Deep integration with Odoo and FilesDNA ERP data.
- **Multi-Channel Support** – Handles web, mobile, email, and WhatsApp seamlessly.
- **Action-Oriented** – Can send emails, schedule meetings, and book appointments.
- **24/7 Availability** – Always online, ensuring round-the-clock customer support.
- **Personalised Responses** – Learns customer preferences for tailored interactions.
- **Seamless Integration** – Connects with existing business workflows and CRM.
- **Scalable & Secure** – Designed for enterprises with robust security measures.

OUR PRODUCTS

Block Chain Explorer

Our "Blockchain Explorer" integrates with our document management system to bring blockchain's security and transparency to document verification and management. By using smart contracts, users can authenticate signatures on documents, with every change logged on the blockchain for full transparency. Documents are linked to unique ERC721 tokens (NFTs) to ensure ownership and prevent unauthorized edits. This system guarantees the authenticity and immutability of documents, streamlining verification and enhancing security.

Enhancing Document Security and Transparency with Blockchain Technology

Integrating blockchain with a document management system enhances security, transparency, and trust. Blockchain's immutable ledger ensures that once a document is created or modified, the record cannot be altered or deleted, making every transaction verifiable and permanent. This technology provides an unparalleled level of integrity for document authentication, version control, and rights management, preventing fraud and unauthorized access. By leveraging blockchain, document management systems can offer users a secure, transparent way to manage critical documents, ensuring compliance and peace of mind in document handling processes.

OUR PRODUCTS

AI and ML

SignDNA

First AI / ML enabled smart digital handwritten signature detection software. Available for most signature pads to detect fraud and in case of high stress under coercion a silent alarm is released. We have developed our very own Smart Signature, which you can use to sign documents via a wireless pen for improved accuracy. We have also taken steps to eliminate forgery, with the Smart Signature Pad coming equipped with artificial intelligence and machine learning technology. This allows our signature pad to identify the features of your own penmanship so that if someone attempts to forge your signature, the signature pad can detect this, and the signature will be invalid. Note: PATENT application pending.

Liveness Detection

Liveness detection is a security measure used in digital identity verification, ensuring that a real person, not a spoof (like a photo or video), is present during mobile or web application processes. Crucial for Know Your Customer (KYC) protocols, it enhances security by requiring users to perform actions in real-time, such as blinking or smiling, making it hard for imposters to mimic. This technology significantly reduces the risk of identity fraud, streamlining user onboarding in sectors that demand reliable identity checks, and ensuring the integrity of online verification processes.

Voice Recognition System

Voice recognition systems identify and authenticate users based on their unique voice patterns. Essential for enhancing digital security, these systems play a pivotal role in various applications, from mobile banking to smart home devices. By analyzing characteristics such as pitch and accent, voice recognition provides a convenient and secure method for verifying i dentities, reducing the risk of unauthorized access. This technology is particularly valuable in processes requiring secure and hands-free operation, offering a user-friendly alternative to traditional security measures.
